

# Ballistic Packages

The Zone Series is our luxury ballistic package offering the lightest and strongest fiber known to man. With our exclusive and proprietary “Z3” technology, one can experience a flexible vest panel that weighs up to 1/3 less than that of panels made with traditional materials. The Zone Series is comprised of 100% Zylon modified to form our exclusive “Z3” technology. Available in levels II and IIIA.

The Epic Series is our high-end ballistic package utilizing the strongest and lightest fibers available. This package combines two ultra-premium ballistic materials resulting in our thinnest and most flexible ballistic panel ever. Ballistic performance is not compromised with this new NIJ 0101.04 certified model producing remarkably impressive backface signatures. The Epic Series is comprised of Zylon and Goldflex™. Available in levels IIA, II and IIIA.

The Armorlite LFT Series is our new ballistic package using a new fiber currently available only through Protective Products International. This new fiber allows for a vest with absolutely **NO** stitching at all. This translates into a lighter, thinner and extremely flexible vest. Available in levels II and IIIA.

The Hybrid Series is our high-performance ballistic package offering protection against non-NIJ threats. The IIIA model has been tested against various foreign threats including, but not limited to: Tokarev, Norinco, Fiocchi and Geco. The Hybrid Series is comprised of Twaron® and Goldflex™. Available in levels II and IIIA.

The Armorlite Series is our advanced all Twaron® Aramid ballistic package. It offers lighter, thinner and more flexible protection to those who must have comfort combined with value. The Armorlite Series is comprised of 100% Twaron® materials. Available in levels IIA, II and IIIA.
