Energy Management

STYLISH WALL MOUNTED UNIT SIMPLY OPERATE BY USING YOUR MAGNETIC STRIPE ROOM CARD

Features:

- Cuts down electricity usage by up to 50%
- Prevents electrical equipment from wasting their technological and economical lifetime through working unnecessarily
- Bright, low powered LED illumination clearly visible in a dark room
- Timed delay to enable ample time for users to exit rooms before the lights switch off
- Elegant wall mounted unit the size of a conventional light switch
- Simple to install

Dimensions: H 3.34", W 3.34", D 0.7"

Color: White

Material: ABS

Depending on your requirements and budgets, GESI can provide you with a choice of two efficient energy saving control units:

Energy Management Controller (EMC)

The EMC controls up to three independent electrical circuits from a remotely mounted control box.

Each circuit is rated at 16A RMS at a voltage up to 264VAC RMS.

Energy Saver (ES)

The ES is an integrated power switch and control unit able to control one power circuit.

The power switch relay contacts are rated at 16A RMS at a voltage up to 264VAC RMS.
